

# NOPEC's Small Business Energy Audit Program

Small Business owners in NOPEC member communities can apply for energy audit funding to cover 60% – 100% of the cost of qualifying energy audits. Get a comprehensive analysis of your building's energy efficiency and receive recommendations for upgrades that can reduce energy costs.

## Small Business Energy Audit Program Benefits

### Up to 100% of Energy Audit Costs Covered

Small business owners can receive 60% - 100% of the cost of a qualifying energy audit performed by a Certified Contractor.

### Vendor Expertise and Priority Status

Get priority status and guaranteed response times when using a Preferred Energy Audit Partner. Preferred Partners are trusted, Ohio-based energy auditing firms that will provide your business with a quality energy audit and report, helping you understand your building's current energy usage and costs and detailing how you can save through energy-efficiency initiatives.

### Access to One-on-One Support

NOPEC is available to help you through the process. From applying for the funds through our easy-to-use application form to helping you decide the type of energy audit you need, NOPEC is here to assist you.

## Why get an Energy Audit?

### Discover New Ways to Save

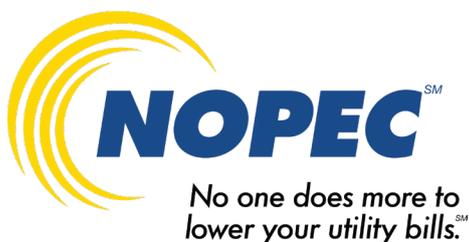

Energy costs are a large part of a small business's operating expenses. Getting an energy audit helps you determine which energy-efficiency projects have the highest return on investment, helping you save energy and improving your bottom line.

### Low-Interest Rate Financing

Many financing programs, including NOPEC's Property Assessed Clean Energy (PACE) and Savings Through Efficiency Program (STEP), require an energy audit when applying for financing for energy-efficiency improvements.
